TECHNICAL SKILLS

IAM / PAM

CyberArk · Active Directory · PKI and digital certificates · Access and permission management

SYSTEMS AND SCRIPTING

Linux · Bash · Python · System hardening · Process automation

DATABASES

Oracle · SQL Server · PostgreSQL · Sybase · MongoDB · DB2 · Backup / restore and high availability

OPERATIONS AND ANALYSIS

SIEM · EDR / XDR · Log and trace analysis · Helix · Jira · Vulnerability management

PROFESSIONAL SUMMARY

IT professional transitioning into cybersecurity, with a technical foundation in database administration across critical 24/7 environments. Experienced in system monitoring, anomaly detection and incident response in production, combined with ethical hacking practice (CTF, HackTheBox) that brings an offensive perspective to defensive analysis. Working knowledge of ISO 27001, GDPR and security tooling.

PROFESSIONAL EXPERIENCE

Junior DBA, Infrastructure & Data — 24/7 Operations and Security

Indra Sistemas · BBVA project | February 2024 – Present

- **Data availability and integrity.** Execution and monitoring of backup/restore policies in high-availability 24/7 environments, ensuring disaster recovery and data protection under GDPR.
- **Vulnerability lifecycle management (patch management).** Coordination and rollout of security updates and patches on database engines during maintenance windows, mitigating the risk of outdated versions being exploited in production.
- **Monitoring and operational incident response.** Analysis of logs, traces and system alerts to detect anomalies and locks, resolving incidents in real time as part of the 24/7 on-call team.

Support and Resolution Technician — Vocational degree internship

Fractalia | 2023 · 3 months

- **Identity and access management (basic IAM).** Direct user support resolving issues with access, passwords and permissions, keeping the service available for the end client.
- **ITSM tooling.** Use of ticketing and service management platforms to track, control and close incidents.

LANGUAGES

Spanish — Native
English — B2 (officially certified)

Able to run technical meetings, write documentation and work in international teams.

AVAILABILITY

Rotating shifts and 24/7 on-call.
Previous experience on an on-call team.

ADDITIONAL DETAILS

Driving licence B and A2. Own vehicle.

CONTINUOUS LEARNING

CTFs and HackTheBox labs.
Sustained practice in exploitation and basic forensics.

CORE SECURITY COMPETENCIES

SOC operations and monitoring	Defensive security	Infrastructure security
- Continuous system monitoring (SIEM) - Incident triage and classification - Playbook-based response	- Threat detection and response (EDR/XDR) - Security hardening - Access control (IAM) - Log and trace analysis	- Linux security - Database security - Process automation - System hardening

EDUCATION

Specialisation in Cybersecurity
UNIE Universidad | 2024 – 2025 | Average grade 8.5/10
Advanced study of security technologies.

Higher Technician in Network Systems Administration
IES José Luis Sampedro | 2021 – 2023 | Average grade 8/10

PROJECTS AND CERTIFICATIONS

Container security research
Final degree project | Grade 8/10
Comprehensive analysis of LXC, Podman and Docker: isolation, attack surface and secure configuration practices.

Applied Machine Learning with Python — certification
Supervised and unsupervised learning, model performance analysis and optimisation.

Ethical hacking practice — CTF and HackTheBox
Solving machines and exploitation challenges, privilege escalation and vulnerability analysis. Offensive insight applied to defensive work.

Technical portfolio
darkstinx.github.io — labs, notes and personal security projects.
